

We at KYGT-LP would like to express our support of locally originated community radio. Since our licensing 2 years ago we have helped our community tremendously. Almost every entity, whether it be social, religious, political, arts uses the radio station. We encourage the expansion of LPFM so other communities can benefit from this useful tool. We have been instrumental in alerting, educating, informing, and entertaining our community. In the past two years we have played a major part in our emergency services, particularly in the 100 year snowstorm of 2003, paralyzing our area with 7 feet of snow. This is a low cost option for communities struggling for a voice. Thank You,

Greg Markle
